For Immediate Release:

Computer Security Handbook Contributor to Speak on Incident Response

February 5, 2009. New York, New York. On March 5, 2009 at 6 PM, the New York Enterprise Windows Users Group extends a free invitation to business and IT professionals to ***Incident Response: What to do when “There is a problem”?*** at the Microsoft New York Customer Briefing Center.

Today, business depends on systems and data. What should you do when you receive a report that something is amiss about one of the firm’s computers? Not the routine missing patch or update, but possible involvement in a violation of policy, improper dealings, harassment, inappropriate explicit material, or worse, a criminal situation such as child pornography. Responding correctly protects everyone’s interests. Conversely, the wrong response can create an imbroglio.

Our speaker will be Robert Gezelter, a Contributing Editor of the upcoming Computer Security Handbook, 5th Edition (Wiley & Sons). Mr. Gezelter is an internationally known speaker, author, and consultant with over 30 years of experience in Information Technology. In addition to his technical practice, he has been consulted on computer-related issues in civil and criminal litigation by attorneys for over 20 years. Mr. Gezelter has also spoken and published extensively on operating systems, networks, performance, security, tools, and similar areas. Since 1985, he has spoken worldwide for organizations including ACM, Encompass/DECUS, ISSA, ISACA, and IEEE. He was appointed to the IEEE Computer Society’s Distinguished Visitors Program for a three-year term in 2004.

Pre-registration is required. Details are at: <http://www.nyewin.org>.
